Quarterly Budget Performance Report – Quarter 4 2019-20

INTRODUCTION

This is the performance report for the fourth quarter of the 2019-20 Budget year for the Republic of Nauru. It includes the preliminary final budget outcome for 2019-20 and revisions to 2018-19. It provides revenue and expenditure data recorded by Treasury for the period 1 July 2019 to 30 June 2020. It is based on all available information to Treasury as at 4 August 2020.

- In aggregate, actual year to date performance exceeded expectations, with 108 per cent of total expected annual revenue collected and 97 per cent of total expenditure spent to 30 June 2020. The balance for the year was \$26.7 million in surplus, 16 per cent of GDP.
- The 2019-20 Budget appropriation lapsed on 30 June 2020, and the surplus balance will be held in cash reserves to support the Government's liquidity position.

This report covers General Government operations. It does not include donor expenditures nor the operations of State-owned enterprises (SoE's), except where transfers from the Government have been made to donor projects or as subsidies/loans to SoE's. It includes receipts from direct budget support donor funding. All figures are in Australian dollars.

OVERVIEW

MACROECONOMIC ASSUMPTIONS

During the quarter, the Covid 19 pandemic had a significant impact on the budget macro-economic assumptions. The April 2020 IMF World Economic Outlook indicated the Nauru economy would contract by 1.7 per cent in 2019-20, against a previous expectation of 0.6 per cent growth. Inflation remained at a similar level of 1.5 per cent. The nominal GDP estimate for 2019-20 is \$164.6 million.

IMPACT OF COVID-19

The economic impact of Covid-19 on Nauru has not been as significant as initially expected. As of end June 2020, there had been no case of Covid-19 on the Island. This reflected in part measures to 'capture and contain' the virus, such as a reduced flight schedule and mandatory quarantine.

In 2019-20, the Government's response to Covid-19 totalled new expenditure measures of \$13.4 million (8 per cent of GDP), funded through a re-prioritisation of expenditure (\$11.8 million) and donor contributions (\$1.6 million). Of this, \$5.4 million related to the Covid-19 Taskforce (medical equipment and consumables, quarantine, air-freight, repatriation and hospital building works), \$5.1 million for liquidity support for Nauru Airlines and \$2.9 million in an ex-gratia payment to public sector employees and pensioners.

Government revenues were not significantly affected by Covid-19, with lower than expected revenue from travel related charges, more than offset by collections in other lines.

SUPPLEMENTARY APPROPRIATIONS

There were no supplementary appropriations in the quarter.

REVISED 2019-20 BUDGET

The revised budget for 2019-20 was revenue of \$249.6 million and expenditure of \$248.8 million with a surplus balance of \$0.8 million.

PRELIMINARY 2019-20 FINAL BUDGET OUTCOME

The preliminary final budget outcome for 2019-20 was revenue of \$268.7 million (108 per cent of budget) and expenditure of \$241.9 million (97 per cent of budget) with a surplus balance of \$26.7 million (16 per cent of GDP), significantly more than expected reflecting strong fisheries and taxation revenue.

PRELIMINARY 2018-19 FINAL BUDGET OUTCOME

The 2018-19 preliminary final budget outcome has been reviewed and amended. This has resulted in an increase in previously reported revenue (mainly RPC related) and decrease in expenditure. Total revenue was \$229.6 million and expenditure of \$207.0 million, with a surplus balance of \$22.6 million (14 per cent of GDP).

FISCAL RESPONSIBILITY RATIOS

The Government has adopted the following fiscal responsibility ratios:

- Fiscal balance to GDP ratio must not be negative budget must at least be in balance
- Fiscal cash buffer cash reserves up to the equivalent of two months non-RPC related expenditure must be available
- Personnel costs to current expenditure to be less than 30 per cent.

All ratios were met at the end of the quarter, as shown in Table 1.

Table 1: Fiscal responsibility ratio performance Q4 2019-20

| Measure | Target | 2018-19 Prelim Actual | 2019-20 Budget | | 2019-20 Q4 Actual |
|-----------------------|--|-----------------------------|-------------------|------|----------------------|
| Fiscal balance to GDP | not negative as % of GDP | 14% | 0.2% | 0.5% | 16% |
| Personnel cost ratio | Personnel cost to current expenditure <30% | 24% | 36% | 20% | 19% |

The IMF recommends that Nauru hold a cash buffer of two-months current Government expenditure. This is calculated by taking total budgeted expenditure less RPC expenditure and non-expense items. The level of the buffer changes when the expenditure estimates are updated, usually after a supplementary appropriation. The most recent balances are shown in Table 2.

Nauru Trust Fund

The annual contribution to the Nauru Intergenerational Trust Fund (NTF) is calculated each year based on the actual revenues of the prior year, excluding donor contributions and budget support (total domestic revenue as defined in the MOU).

The calculation takes total prior year revenues, less RPC reimbursable related revenue and general budget support. The proposed contribution based on the formula from the MOU with Australia is for the high growth year revenue band 2 (over \$100 million) at 10.1 per cent. The calculation and proposed payment schedule is shown below.

TOTAL BUDGET AGGREGATES

The total budget aggregates for the 2019-20 Budget and actuals to 30 June 2020, as well as the updated preliminary final budget outcome for 2018-19 are shown in Table 3 and Figure 1.

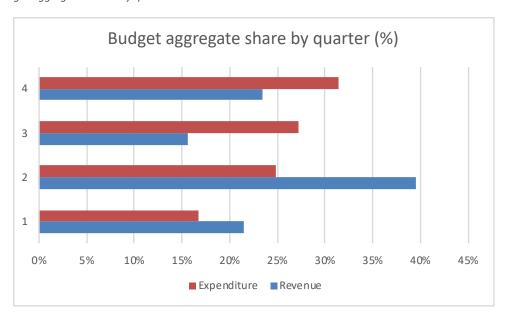

2019-20 aggregate performance was better than expected. Revenue collections peaked in the second quarter and were stronger than expected in the fourth quarter, with the expected impact of Covid-19 not eventuating. Expenditure gradually accelerated as the year progressed, finishing with a small underspend at the end of the year.

The preliminary final budget outcome for 2018-19 has been reviewed and updated. This has resulted in an increase in previously reported revenue (mainly RPC related visa fees) and decrease in expenditure. Total revenue was \$229.6 million and expenditure of \$207.0 million, with a surplus balance of \$22.6 million (14 per cent of GDP).

OPERATING REVENUE ANALYSIS

Actual revenues for the year were stronger than expected (Table 4). The impact of Covid-19 on travel related revenues was more than offset by collections in other lines, notably fishing and tax revenues.

Revenue collections are highly seasonal, peaking in the second quarter for the most significant revenue lines, as shown in Figure 2. Fisheries revenue peaks in December as licences and fishing days are sold for the next calendar year.

Initial expectations were that the Coronavirus pandemic would put some revenue collections at risk in the fourth quarter, mainly as a result of travel restrictions. In the event, whilst the expected reduction in civil aviation revenues occurred (50 per cent of expected collections, \$2.8 million), the other at risk revenue lines, including employment withholding tax and fisheries revenue, performed strongly, in excess of expectations.

Given the strength of revenue collections in the fourth quarter, the timing of the Asian Development Bank (ADB) general budget support grant was rescheduled to the first quarter of 2020-21.

Figure 2 Revenue Collections by quarter 2019-20

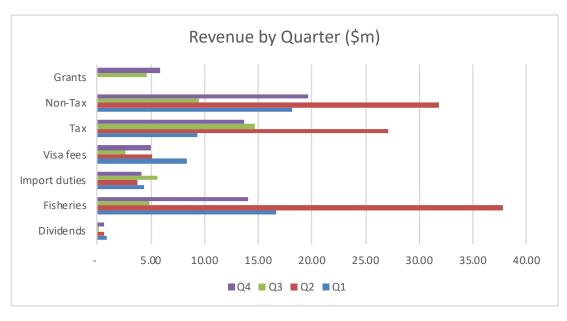

Figure 3 shows the split of revenue by group. In 2019-20, non-tax revenue accounted for the most revenue collected at 29 per cent. 93 per cent of these collections were related to the Regional Processing Centre (RPC). Fisheries licences were 27 per cent of total revenue, and Tax 24 per cent. Most tax collections (98 per cent) were also related to the RPC and the economic activity it generates.

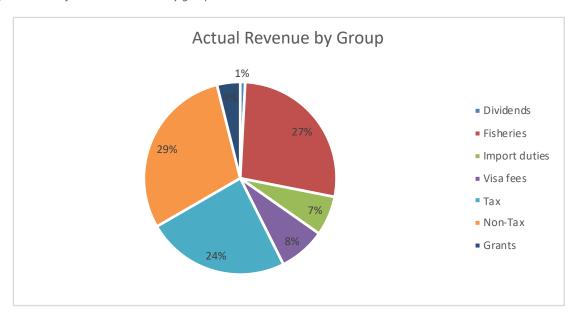

Figure 3 Share of revenue collections by group 2019-20

The RPC is a key source of economic activity and revenue for the government, accounting for 58 per cent of total revenues in 2019-20 (Table 5). All these revenues are at risk as the RPC winds down towards an enduring capability.

FISHING REVENUES

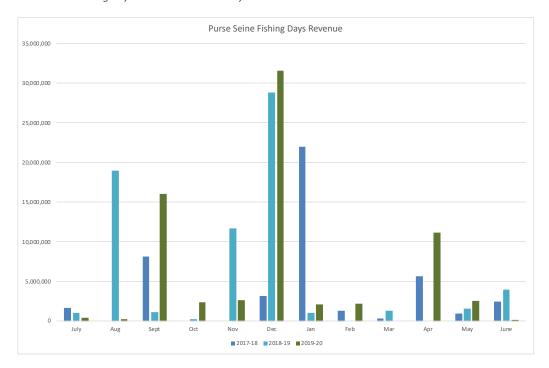

Fishing revenues exceeded expectations in the final quarter to exceed the budget estimate (Table 6). This revenue group is strongly seasonal, with the majority of revenue being received in the second quarter. The expected decline in demand for fishing days in the fourth quarter as a result of Covid-19 did not eventuate. Total revenues for the quarter were in the order of \$14 million, 19 per cent of the total annual collection.

The monthly revenue collections for purse seine fishing days (1072) for the past three years are shown in Figure 3. Performance in 2019-20 is broadly similar to prior years, reflecting the peak in December/January as fishing licences and days are purchased ahead of the start of the new fishing season.

Figure 3 Purse Seine Fishing days revenue collections by month 2017-18 to 2019-20

TAXATION REVENUE

Taxation revenues exceeded expectations (Table 7). Collections do not appear to have been adversely affected by Covid-19. The main driver of tax revenues is the RPC. Notwithstanding the continued decline in the number of refugees and asylum seekers on island, income generated from business profits tax and employment withholding tax continues to grow.

CUSTOMS AND OTHER IMPORT DUTIES

Customs and excise duty collections also exceeded expectations, with total revenue similar to total collections for 2018-19 (Table 8). Customs and excise duty on sugar continues to be collected at a higher rate than anticipated at budget.

VISA FEES

Total revenue from visa fees was higher than expected in all lines except Visa Fees – RPC (see Table 9). This reflected the continued decline in RPC activity, and resolution of historical invoices.

Non-tax Revenue

Non-tax revenue collections in the year to date came in marginally below budget (Table 10). As expected, revenues from civil aviation (DCA Departure taxes, air navigation fees, landing fees and rental fees) were significantly lower than budgeted, reflecting Covid-19 travel restrictions.

OTHER REVENUE — DIVIDENDS AND GRANTS

Income from dividends and grants was received during the quarter (Table 11). Direct budget support was received from Taiwan and the expected support from the ADB related to the policy based grant was deferred to 2020-21. A further dividend from Digicel was received during the quarter.

Figure 4 illustrates the expenditure by quarter. Expenditure continued to accelerate as the financial year came to an end, especially for government operations, capital expenditure and personnel. \$73.9 million (31 per cent) of total annual expenditure was outlaid in the fourth quarter.

Figure 4 Expenditure by Quarter 2019-20

BUDGET REALLOCATIONS

Through the year, Departments are able to re-allocate their budgets within their appropriation limit through Inter Sub-Head Transfers (ISHTs). ISHT reallocations accounted for 7 per cent of total budgeted expenditure in 2019-20. The average monthly volume of ISHTs and payment vouchers (PVs) processed by the Treasury on behalf of Government is shown in Figure 5.

Significant ISHTs were approved by Cabinet in the fourth quarter (\$8.2 million or 46 per cent of total transfers for the year) as departments sought to use underspends in personnel and government travel to fund increases in government operations, capital expenditure (especially purchase of plant and equipment such as motor vehicles, computers, and mobile phones), subsidies and social benefits.

Funds previously set aside to fund a public service pay rise were used to pay a Covid-19 ex gratia payment, to government employees, pensioners (social benefits) and SOE staff (subsidies).

The non-expense item ISHTs mainly reflected the use of the fiscal cash buffer to cover Covid-19 Taskforce related expenses and subsidies to SOEs (mainly Ronphos).

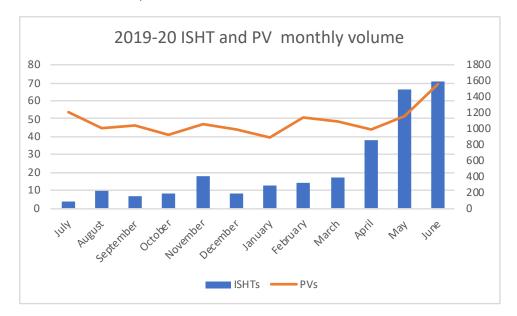

Figure 5 2019-20 ISHT and PV monthly volume

PERSONNEL COSTS

Expenditure on personnel finished the year under budget (Table 14), despite the use of ISHT's to reallocate expenditure to other lines, and a Covid-19 ex gratia payment in June 2020.

Lower expenditure on personnel reflects high vacancies across the public service, as departments struggle to advertise and fill positions. The provision for a public service wage increases which did not eventuate was only partially utilised. Public service pay rises have been announced for 2020-21.

Provisions made for additional local salary in supplementary appropriations were essentially undone by ISHT reallocations, such that the final revised budget was within \$1.8 million (4.4 per cent) of the original budget.

GOVERNMENT TRAVEL

Expenditure on Government Travel (Table 15) was significantly impacted by Covid-19 travel restrictions, with only 7 per cent of total travel expended in the fourth quarter. The unspent funding was reallocated to other priorities.

SUBSIDIES & DONATIONS

Expenditure on Subsidies & Donations (Table 16) was close to 100 per cent. This group was the beneficiary of ISHT allocations during the quarter, mainly from the fiscal cash buffer to subsidies to SOEs.

Payments to SOEs during 2019-20 were significantly higher than originally planned in the budget. Figure 6 shows the allocation of these payments.

The main beneficiary was Ronphos, which was unable to meet its financial commitments through the year without Government support. Government payments to Ronphos included cash flow support and payment of outstanding arrears with other SOEs (mainly Nauru Utilities Corporation and Nauru Maritime and Port Authority), other suppliers as well as equipment purchases and land rental payments.

Ex gratia payments relate to supplementation from Government for payments to employees to ensure consistency with government employees for one-off payments, including 19 per cent ex gratia payment, windfall revenue dividend and Covid-19 ex gratia payment.

CAPITAL EXPENDITURE

Overall capital expenditure was close to the final revised budget (Table 17). Final actual expenditure was 92 per cent more than what had been originally allocated to this category. This mainly reflected increases in plant and equipment purchases. Actual expenditure on plant and equipment for the year was nearly five times more than originally budgeted. The funds were mainly sourced from ISHTs from underspends in other lines.

More than half (57 per cent) of the total annual expenditure on plant and equipment was outlaid in the fourth quarter. As the financial year came to an end, underspends in other lines were reprioritised to purchase motor vehicles, computers, lap tops, mobile phones and furniture etc.

Actual expenditure on medical equipment was more than is shown, as an additional \$0.6 million worth of equipment was purchased through the Covid-19 Taskforce (classed in government operations), some of which was funded by donors. This included the purchase of an oxygen plant and testing equipment.

SOCIAL BENEFITS

Expenditure on social benefits (Table 18) was boosted in the final quarter with the Covid-19 ex gratia payment funded through an ISHT from a previous provision for public service wages rises.

Total annual expenditure on this group was more than twice that originally budgeted.

Expenditure in this category is in line with expectations (Table 19). Bank charges relate to telegraphic transfer and account keeping fees paid through the year.

Non-expense Items

Items in this category were fully expended (Table 19). Additional payments to Bank of Nauru bank book holders were funded through ISHTs from underspending lines. The Trust Fund expenditure included a \$6.7 million pre-payment on the 2020-21 contribution. ISHT's from the fiscal cash buffer supported Government to address urgent and unforeseen expenditure, mainly related to subsidies to SOEs (Ronphos cash flow). The Exim loan and loan expenditure account were both funded to Ronphos.

GOVERNMENT OPERATIONS

Overall, expenditure on government operations was consistent with expectations (Table 21).

ISHT's were used to reallocate funds between categories, the most significant being the allocation to the Contingency Fund, to support the Government's immediate response to the Coronavirus pandemic. More detail is in Table 22.

Expenditure on membership fees and subscriptions reflected payments to address outstanding membership arrears for the International Civil Aviation Organisation (ICAO) and Association of the Caribbean and Pacific (ACP). These dated back many years.

R&M buildings was significantly higher than budgeted, supplemented by ISHTs. However most health related expenditures, other than overseas medical referrals, were underspent, despite ISHT reallocations.

Total annual actual expenditure on Salaries - other contracts was more than double the original budget. This in part reflected the extension in RPC arrangements and Government decisions to expand security contracts to expatriate houses and government buildings.

COVID-19 RELATED EXPENDITURE

In March 2020, the Government established a Covid-19 Taskforce to coordinate its health (medical equipment and supplies), quarantine and other support requirements for the pandemic. The Government also provided cash flow support to Nauru Airlines and a stimulus payment to government employees. The Government's support is illustrated in Figure 7 and detailed in Table 22.

In total, \$13.4 million was spent on Covid-related activity in 2019-20, equivalent to 8 per cent of GDP. Expenditure was met through a mix of the Contingency Fund, a re-prioritisation of funding through ISHTs (the fiscal cash buffer), provisions for wage rises, and donor contributions.

EXPENDITURE BY DEPARTMENT

Table 23 shows actual expenditure for the year to date by department head. Most departments came in within 15 per cent of budget. Notable exceptions include Audit, TVET and some DFAT posts. Land management was over budget, reflecting in part its very small budget and issues with payroll funds control.

CASH POSITION

The Government continues to maintain a healthy cash position as illustrated in Figure 8. At the end of the quarter total funds were \$117.3 million. The cash buffer requirement of two months of non-RPC expenditure was adjusted after Supplementary Appropriation No 5 2019-20 to \$32.3 million. Total funds were significantly in excess of the recommended fiscal cash buffer, with \$29.3 million quarantined in separate cash buffer accounts.

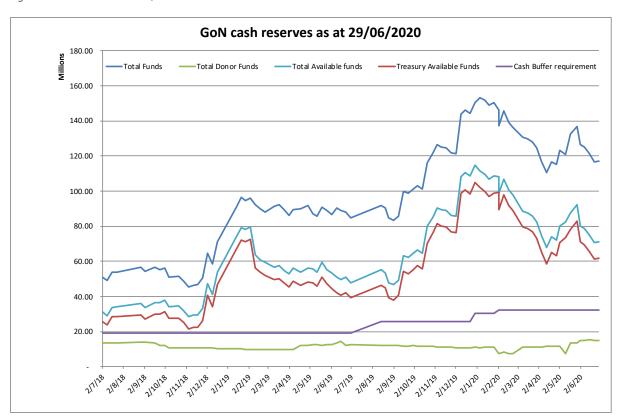

Figure 7 GoN Cash reserves Q4 2019-20

Total Funds includes all accounts available to Government, including donor and project funds.

Total Available Funds comprises Total Funds, less term deposits, donor funds and those quarantined for a specific purpose, such as unclaimed land rental.

Treasury Available Funds comprises at call funds where Government has full discretion over use. It comprises Total Funds, less term deposits, donor, SOE and project funds (including quarantined funds).
