Quarterly Budget Performance Report – Quarter 3 2022-23

INTRODUCTION

This is the performance report for the third quarter of the 2022-23 Budget year for the Republic of Nauru. It provides revenue and expenditure data recorded by Treasury for the period 1 July 2022 to 31 January 2023. It is based on all available information to Treasury as at 9 April 2023.

- In aggregate, actual year to date performance is a surplus \$10million, with 77% of total expected annual revenue collection, and 73% total expenditure against benchmark of 75%.
- The Q3 surplus position is a much better outcome compared to the deficit position of \$5m recorded for Q2. This outcome is a result of improved collections from all revenue lines particularly RPC related revenues such as Dividends from ESC operations and Hosting fees drawdown from the Commercial account.

This report covers General Government operations only. It does not include donor expenditures nor the operations of State-owned enterprises (SoE's). However, where there are transfers from Government to SoEs, these are included. All figures are in Australian dollars.

OVFRVIEW

MACROECONOMIC ASSUMPTIONS

The macro-economic assumptions for Nauru have been upgraded moderately following publication of the International Monetary Fund (IMF) World Economic Outlook in April 2022.

| Item | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
|---|---------|---------|---------|---------|
| Real GDP Growth (per cent change) | 0.7 | 1.6 | 0.9 | 2.6 |
| Nominal GDP (\$A million) | 171 | 179 | 184.5 | 189.6 |
| Consumer prices (period average, per cent change) | 0.9 | 1.2 | 1.4 | 1.7 |

According to IMF, the global economic recovery is projected to slow from an estimated 6.1% in 2021 to 3.6% in 2022 and 2023.

Beyond 2023, global growth is forecast to decline to about 3.3% over the medium term. War-induced commodity price increases and broadening price pressures have led to 2022 inflation projections of 5.7% in advanced economies and 8.7% in emerging market and developing economies.

Multilateral efforts to respond to the humanitarian crisis, prevent further economic fragmentation, maintain global liquidity, manage debt distress, tackle climate change, and end the pandemic are essential.

The Fund is of the view that diversifying the economy is the way forward. Diversification to obtain new sources of growth will require supporting policies to accelerate investment in human capital and

infrastructure, and efforts to improve the business environment. Mitigating the effects of climate change can help the transformation required to raise potential growth and achieve fiscal self-reliance.

Public spending mostly in improving infrastructure, subsidies, and donations to SOEs and ensuring public sector operates smoothly during a challenging year has resulted in IMF moderating Nauru growth projections.

With the extension of RPC to mid-year, the IMF anticipates Gross Domestic Product (GDP) for FY 2022-23 to grow by 2.6% year on year- 1.7% age basis point higher than current year growth. The inflation outlook has strengthened to 1.7% due to inflationary pressures as global conditions stabilised after COVID-19. The nominal GDP estimate for 2021-22 is \$184.5 million and this is projected to increase to \$189.6 million for FY 2022-23.

Supplementary Appropriations

There were no supplementary appropriation budgets passed during the quarter.

FISCAL RESPONSIBILITY RATIOS

The Government has adopted the following fiscal responsibility ratios:

- Fiscal balance to GDP ratio must not be negative budget must at least be in balance;
- Fiscal cash buffer cash reserves up to the equivalent of two months non-RPC related expenditure must be available;
- Personnel costs to current expenditure to be less than 30 per cent.

The condition for the positive fiscal balance to GDP ratio was met. It is worth highlighting that the deficit bottom line recorded in Quarter 2 has been reversed.

The Personnel cost ratio is within the 30% required benchmark by the end of the Quarter 3.

All ratios are shown in Table 1 and Table 2 below.

Table 1: Fiscal responsibility ratio performance Q3 2022-23

| | | | 2022-23 | 2022-23 | 2022-23 |
|-----------------------|--|---------|----------|---------|---------|
| | | 2021-22 | Approved | Revised | YTD |
| Measure | Target | Actual | Budget | Budget | Actual |
| Fiscal balance to GDP | not negative as % of GDP | 13% | 0.30% | 0.42% | 5% |
| Personnel cost ratio | Personnel cost to current expenditure <30% | 14.3% | 21% | 18% | 18% |

The IMF recommends that Nauru hold a cash buffer of two-months current Government expenditure to manage liquidity risks. The buffer target is calculated by taking the total budgeted expenditure less RPC expenditure and non-expense items. The level of the buffer changes when the expenditure estimates are updated, usually after a supplementary appropriation. The most recent balances are shown in Table 2.

The cash buffer accounts hold just a little less than the minimum required two months of adjusted expenditure. Even though, the cash buffer requirement is not up to expectation by the end of this quarter, this is likely to be addressed in the next and final quarter. More detail on cash balances is shown in Figure 6.

| of which held in cash buffer accoun | nts | 40,070,267 | 40,159,058 | | | | | | |

BUDGET AGGREGATES

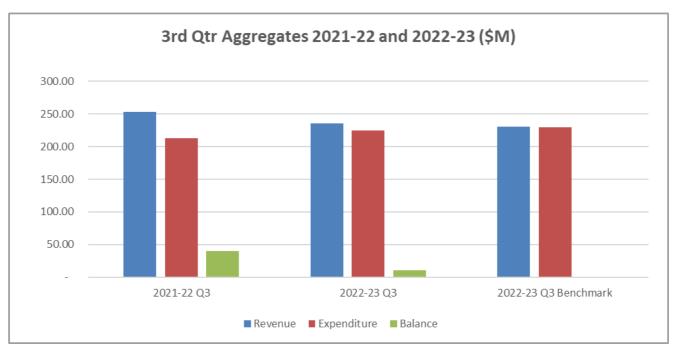

The budget aggregates for the first quarter are shown in Table 3 and Figure 1 below. There have been slight deviations in performance compared to the benchmark. During the quarter, a total of 235.1m of the total revenue, which accounts for 77% of the total revenue, was collected. While this exceeds the benchmark of 75% for the quarter, it falls short of the revenue collected for the same period last year, which amounted to \$252.8m.

In terms of expenditure, it amounted to \$225.1m falling within the benchmark set for Quarter 3. However, it is higher than the \$212.6 million spent during the same period last year.

OPERATING REVENUE ANALYSIS

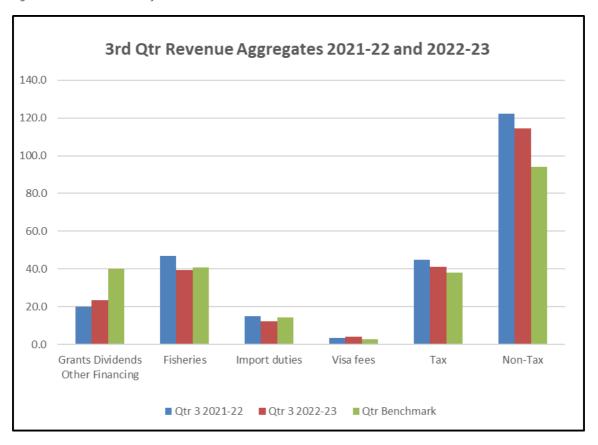

Table 4 summarizes the actual revenues for the year up to Quarter 3 are summarised in Table 4 below. Majority of the collections were from Non tax (encompassing RPC related revenue), Taxes, Fisheries and Grants and Dividends.

Table 4: Revenue breakdown Q3 2022-23

| Non-Tax | 135,649,912 | 107,297,088 | 18,012,934 | 125,310,022 | 114,542,840 | 49% | 91% | 10,767,182 |
| Total Revenue | 320,348,009 | 253,329,350 | 53,855,570 | 307,184,920 | 235,103,743 | 100% | 77% | 72,081,177 |

Figure 2 below provides a comparison between Quarter 3 of the current financial year, 2021-22 and the same period of the previous financial year (2021-22). Except for Grants Dividends and Other Financing and Visa fees, the revenue collections in this year's quarter were lower compared to the previous year, resulting in a net variance of \$17.7m. The change can be attributable to the timing differences in the drawdown of hosting and dividend revenue from the Commercial and Services account.

Figure 2 Revenue collections for Q3 2021-22 and 2022-23

Revenue Quarterly Performance

Table 5 and Figure 3 below aim to demonstrate the year-to-date quarterly collections and the collection performance of the reported quarter relative to the previous quarter (Q2).

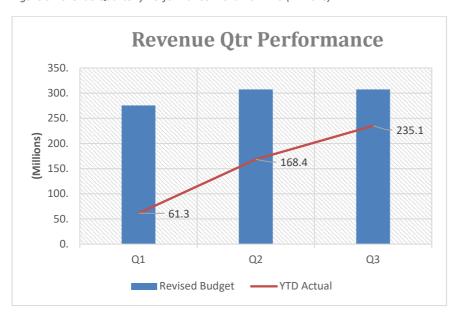

In Quarter 3, a total of \$66.7 million in revenue was received, which accounts for approximately 40% increase from the collection recorded in Q2. Much of the revenue collected included non-Tax

comprising of Hosting fees of 21.2m and Reimbursable of 1.9m. Other increases were from Dividends from RPC operations (18m), Taxes (\$8.7m) and, Fishing licenses (\$3.3m).

Table 5: Revenue Quarterly Performance Q3 2022-23 (millions)

Figure 3 Revenue Quarterly Performance Trend 2022-23 (millions)

The RPC remains the major source of economic activity and revenue for the government, accounting for 53% of the total revenue for the original budget of 2022-23 and 61% for the Revised budget after the passage of three Supplementary Appropriations passed. So far, a total of \$168.8 million has been received from RPC related revenue lines, comprising 72% of the total Government revenue collected during the year.

The 2023-24 original budget took a conservative approach on the estimations of tax streams and MCA reimbursables due to the expected winddown of RPC services earlier in the year. Supplementary budgets were made during Quarter 1 and 2 to reflect the confirmation of extensions of services on the island.

FISHING REVENUES

An additional \$3.3m in Fishing revenues was collected during Quarter 3, consolidating the year-to-date collections to \$39.4m (Table 7). Fishing collections are on track, and the remaining balance is expected to be fully received by the end of the financial year.

Table 7: Fishing revenues Q3 2022-23

TAXATION REVENUE

Taxation revenues have performed much better than expected in the third quarter (Table 8), thanks to consistent collections from all tax categories, primarily due to the extension of the RPC arrangements. It is worth noting that, 80-90% of tax collections are derived from RPC related services. Collections are expected to be fully received by the end of the financial year.

Table 8: Taxation revenue Q3 2022-23

| Description | 2021-22 Preliminary Actual \$ | 2022-23 Approved Budget \$ | 2022-23 Supp Bills \$ | 2022-23 Revised Budget \$ | 2022-23 YTD Actual \$ | YTD Actual as % of % | 2022-23 Remaining Budget \$ |

| Total Tax | 58,066,656 | 34,600,000 | 16,040,000 | 50,640,000 | 41,214,759 | 81% | 9,425,241 |

CUSTOMS AND OTHER IMPORT DUTIES

Table 9 shows that Customs and excise duty collections for the quarter were slightly lower than anticipated, accounting for 63%, of the revised year to date budget and falling short of the benchmark of 75%. This below-average performance is anticipated to continue for the remainder of the year, primarily due to decreased cargo volumes in both air and sea freight. The decline can be attributed to the gradual reduction of RPC services on the island.

Table 9 Customs and other Import duties Q3 2022-23

VISA FEES

Visa fees (other business) encompasses fees collected from employees of various businesses on the island, such as CTS, Capelle's, Chinese retailers, and others, see Table 10.

By the end of the quarter, Visa collections have surpassed the total revised budget, which can be attributed to the extensions of RPC active status arrangements and the changed COVID 19 situation on the island, resulting in increased border movements. Although Visa Fees RPC resettlement has surpassed the total budget at the end of Quarter 3, the total annual collections after the end of the Quarter 4 is expected to be even higher.

OTHER REVENUE — DIVIDENDS AND GRANTS

Table 11 presents Income from dividends and investments and includes the loan proceeds for the Nauru Airline Aircraft Replacement program. Current efforts are being made to locate the second passenger aircraft. According to the aircraft loan agreement, the funds will be received by the Government and then channelled to Nauru Airlines, for the ultimate purchase of the aircraft.

The second tranche of the National development project grant for 2022 was received in November under the previous agreement. The second tranche which will be paid under the terms of the new grant agreement is expected to be received in the fourth quarter.

NON-TAX REVENUE

Non-tax revenue collections in the year to date have exceeded the quarter benchmark (Table 12), primarily due to higher collections from Reimbursable lines resulting from RPC extensions that were unable to be confirmed at the start of the year.

Drawdowns for hosting fees are typically made based on the cash position of the Commercial bank account. During this quarter, a total \$21.1 million was drawn, leaving a balance \$10.4 million to be processed during the year when there is adequate cash balance in the Commercial account to do so.

No new collections were made from the RPC Management fee during the quarter, as RPC extensions for January-December are being finalized and, awaiting signing by the Government of Nauru and Australia. Once agreements have been finalized which is expected during Quarter 4, drawdowns for Reimbursable revenue and management fee are expected to be paid by Australia.

REVENUE BY DEPARTMENT

Table 13 presents revenue for the year to date categorised by department head. It's important to note that this funding is not specifically allocated to these department heads but rather reflects the revenue classification method used in the FMIS. This classification is consistent with each department's administrative functions concerning revenue. The functional mandate of revenue collections is vested in the Nauru Revenue Office.

OPERATING EXPENDITURE ANALYSIS

Table 14 presents the total operational expenditure for the second quarter, which falls within the quarterly utilization benchmark. During this quarter, a total of 98 Inter-subhead transfers was processed, amounting to around \$5.6m, accounting for around 2% of the total revised budget.

Figure 3 provides a comparison of expenditure utilization for the third quarter of the current fiscal year (2022-23), with the same period last year (FY 2021-22).

Except for Capital Expenditure, Social Benefits, and Transfer Non-Expense, the actual expenditure in all the lines is higher this year compared to 2021-22, reflecting a net variance of \$12.6million.

Figure 4 Expenditure by group, Q3 2022-23

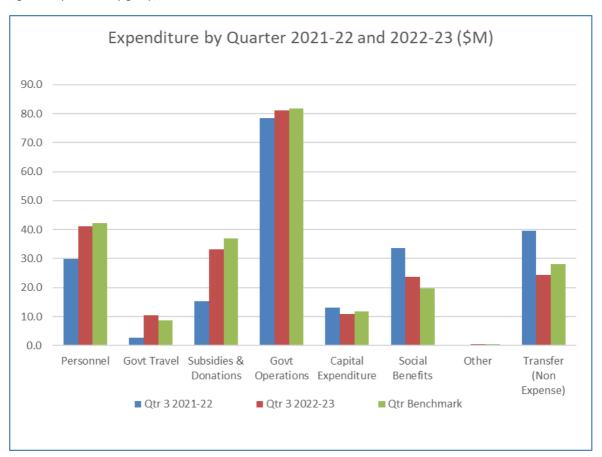

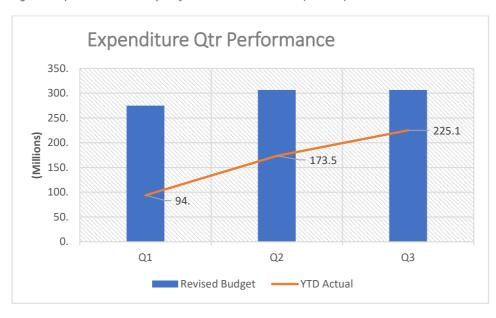

Table 15 and Figure 5 below demonstrate year to Date expenditure at the end of each quarter and the change in spending compared to the previous Quarter.

A total of \$51.7 million in expenditure was recorded during the Quarter, accounting for approximately 30% change from the utilization level of Quarter 2. The major utilization variances were seen in Government operations (\$23.4m), Personnel Expenditure (\$12m) and Capital Expenditure (\$5.2m), Subsidies and Donations (\$4.7m), Social Benefits (\$3.2m) and Government Travel (\$3.1m).

Figure 5 Expenditure Quarterly Performance Trend 2022-23 (millions)

Personnel Costs

According to Table 16, expenditure on Personnel is within the expected limits.

However, there are varying utilization rates across different subheads. Expenses on the basic salary lines significantly exceed the quarterly benchmark. On the other hand, subheads such as Directors Fees, Staff Training, Recruitment and Uniforms are currently tracking well below the budget, which were the same results noted in the previous quarter report. The utilization rate for GoN super

contributions is well within the quarterly expectations and it is expected that the full year actual will be way lesser than budgeted, hence resulting in a huge underspend.

GOVERNMENT TRAVEL

Travel expenses have significantly surpassed the quarterly benchmark and have reached a critical point, approaching the budget limit, as indicated in Table 17. It is essential to implement cost restraint measures by closely monitoring travel expenditures in future quarters to align them with the budget. However, cost restraint is unlikely to be adopted in key departments such as Presidency and Ministerial, so it is recommended to reallocate funds from other underspending accounts to ensure travel can continue for the rest of the financial year.

SUBSIDIES & DONATIONS

Subsidies and Donations are within the benchmark for the quarter, as shown in Table 18. Key development during the quarter includes transfer of CSOs funding to State Owned Entities (SoEs), expenses related to tug boat hire, and \$0.5m in operational grants.

Table 18 Subsidies & Donations Expenditure Q3 2022-23

CAPITAL EXPENDITURE

Capital expenditure is within the quarter benchmark, as indicated in Table 19. Overall, the utilization rate for Capital expenditure utilization has significantly improved compared to Quarter 2, doubling from 36% to 70%. This improvement is attributed to major developments during the quarter, such as the \$1.3m disbursement toward the Higher Ground Initiative project, covering land clearing and architectural and engineering plans, \$0.6m for the ongoing Port Project, \$0.7m payment for the seawall construction project, and \$0.9m to settle the acquisition of a government land in Canberra for a new chancery. The high utilization of Government's capital programs demonstrate Government's commitment to long term growth and development.

SOCIAL BENEFITS

Expenditure on social benefits has a high utilisation rate, reaching 90% of the budget by the end of Quarter 3, as shown in Table 20. This is mainly due to advances and one-time disbursements of Nauru community housing funds to contractors and ex-gratia payment to workers, aimed at mitigating the impact of COVID 19 during the outbreak in June 2022.

However, spending in recurring general social service expenditures such as births, deaths, back to school allowances and pensions are largely within budget as expected, except for Disability Allowances which is way above the quarterly benchmark. At this rate of utilization, Disability allowance subhead will need to be supplemented to ensure no disruptions in payouts to beneficiaries.

Spending on Scholarships has also exceeded the quarterly benchmark, as expected due to the seasonal nature of payments of tuition and boarding fees for students studying in Australia aligned with school terms.

Table 20 Social Benefits Q3 2022-23

OTHER

Expenditure in this Other category is slightly lesser than expected as shown in Table 21. This can be attributed to a delay in posting bank charges and account keeping fees incurred on the various government bank accounts.

Table 21 Other Q3 2022-23

| Description | 2021-22 Preliminary Actual \$ | 2022-23 Approved Budget \$ | 2022-23 Supp Bills \$ | 2022-23 ISHT \$ | 2022-23 Revised Budget \$ | 2022-23 YTD Actual \$ | 2022-23 Actual as % of % | 2022-23 Remaining Budget \$ |

Non-expense Items

Expenditure in the Non-Expense items category has not changed since Quarter 2, see Table 22 below. While non new expenditures have been incurred during this quarter, it is anticipated that provisions in the Trust Fund and the Fiscal Cash Buffer will be fully drawn down before the end of the financial year, specifically in Quarter 4. The remaining balance of \$6.3m in the Trust Fund will be used to prepay part of Nauru's contributions for the new fiscal year, 2023-24.

In respect to the balance under the Fiscal Cash Buffer, it is anticipated that this provision will be reallocated via ISHTs to fund expenditure commitments across departments especially those relating to Travel as well as other commitments that may arise during the final quarter.

The Debt repayments-other category includes the repayment of the Nauru Aircraft replacement program loan to EXIM Bank and RONWAN capital redistribution to members from the old Bank of Nauru debts. Currently, \$5.3 million out of the \$5.8 million allocated for RONWAN capital redistribution has been utilised. The remaining balance is expected to be utilised in the remaining months once the accounts details of account holders have been confirmed.

GOVERNMENT OPERATIONS

In terms of Government Operations, the overall expenditure is largely consistent with expectations (Table 23). However, there are mixed results in the individual subhead lines within the group.

Some expenditure items are significantly exceeded the budget, with utilization rates above the 80% level. The reasons for high utilization vary for each line, and include the seasonal nature of payouts, timing of commitments timing and strategic stock management.

On the other hand, there is significant underspending in other lines with rates of utilization below 60%. The lower-than-expected spending can be attributable to the seasonal nature of commitments,

procurement delays and change of priorities. Underspending can also be a result of expenditures being based on need, such as funding allocations for statutory expenditure lines like Contingency and Deportee removal.

EXPENDITURE BY DEPARTMENT

Table 24 shows actual expenditure, categorised by department head for the year to date. Most departments are spending ahead of their budget, with expenditure utilization rate far exceeding the quarter benchmark. This includes departments such as Presidency, Ministerial, Emergency, Climate Change, Police, Multicultural Affairs, Suva, New York, Disability, and ICT.

The overspending can be attributed to the seasonal nature of significant expenditure measures in these departments. Another reason for high expenditure utilization could be due to incorrect forecasting and projections or purely unforeseen circumstances where the department ends up spending more than anticipated.

Two departments namely India and Land Management have exceeded their annual budget limits. While the overspending of the India budget is due to incorrect forecasting and projections, the cause of overspending in Lands Management is a result of salary posting errors. Finance is working with HR payroll to adjust these errors, to be reflected in the next quarter report. As for the Nauru High Commission in India, there is an expectation of new bilateral funding from the Government of India, which will be used to adjust their excessive spending and bring it back in line with the Treasury fund budget limits.

CASH POSITION

By the end of the end of the quarter, the total funds held by the Government both cash and in the bank amounted to around \$130.1 million. The cash buffer requirement which is equivalent to two months of adjusted expenditure was \$40.4 million. \$40.1 million were held in the Buffer bank accounts as of 26 December 2022; this will be adjusted in Quarter 4 to comply with the Government's established fiscal rules on cash holdings.

The category of Total Funds encompasses all accounts available to the Government, including donor and special project funds.

Total GoN Available Funds refers to all Treasury bank accounts, cash reserves, term deposits, and overseas mission Imprest accounts. However, it does not include donor funds and funds quarantined for a specific purpose, such as Port Project and Unclaimed land rental.

Treasury Liquid Funds comprises of bank accounts and cash balances that the Government has complete discretion over for day- day operations.
